1. RFA-HD-16-006 : Tools for Assessment and Improvement of Neurologic Outcomes (R41/R42)

Release Date: 08-12-2015Open Date: 11-10-2015Due Date: 12-10-2015Close Date: 12-10-2015

Background Improving pregnancy outcome is a prime mission for Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD). Neonatal neurologic disease contributes a significant burden to patients, their families and society. Neonatal encephalopathy (NE) affects up to 3.3/1000 term and late preterm infants in the developed world. Hypoxic ischemic encephalopathy (HIE), a ...

3. 01: Smart Health (SH) and Biomedical (BM) Technologies

Release Date: 11-08-2015Open Date: 11-08-2015Due Date: 12-08-2015Close Date: 12-08-2015

Smart Health (SH) The need for a significant healthcare transformation has been recognized by numerous organizations, including the President's Council of Advisors on Science and Technology (PCAST), National Research Council (NRC), Institute of Medicine (IOM), Computing Community Consortium (CCC), the National Academy of Engineering and the Office of the National Coordinator for Health Information ...

4. 02: Biological Technologies (BT)

Release Date: 11-08-2015Open Date: 11-08-2015Due Date: 12-08-2015Close Date: 12-08-2015

BT1. Agricultural and Food Safety BiotechnologyNew approaches for meeting the world's future nutritional needs. For Agricultural Biotechnology, target areas for improvement may include (but are not limited to) drought tolerance, improved nutritional value, enhanced disease resistance, and higher yield. Proposers should use biotechnology in their approach, and should give consideration to technolog ...

5. 03: Chemical and Environmental Technologies (CT)

Release Date: 11-08-2015Open Date: 11-08-2015Due Date: 12-08-2015Close Date: 12-08-2015

The Chemical and Environmental Technologies (CT) topic covers a wide range of technology areas of current and emerging commercial significance pertaining to the broad chemical industry, the environment and related industrial sectors. Phase I proposals would typically be at the proof of concept/technical feasibility stage on new or novel technology concepts and innovations when submitting to this o ...

6. 04: Educational Technologies and Applications (EA)

Release Date: 11-08-2015Open Date: 11-08-2015Due Date: 12-08-2015Close Date: 12-08-2015

Administrative InformationSubmitted proposals for education applications should provide detailed descriptions of how the proposed application will work and provide examples of how users would interact with the application and how learning takes place. Projects that propose technologies or products similar to those in the marketplace or those similar to existing products and processes must make the ...

7. 05: Electronic Hardware, Robotics and Wireless Technologies (EW)

Release Date: 11-08-2015Open Date: 11-08-2015Due Date: 12-08-2015Close Date: 12-08-2015

Sensors (SE) Recent technological advancements in materials science and bioengineered systems have made inexpensive, powerful, and ubiquitous sensing a reality. Examples range from truly smart airframes and self-evaluating buildings and infrastructure for natural hazard mitigation to large-scale weather forecasting, self-organizing energy systems, and smart devices that self-assemble into networks ...

8. 06: Internet of Things (I)

Release Date: 11-08-2015Open Date: 11-08-2015Due Date: 12-08-2015Close Date: 12-08-2015

The Internet of Things (IoT) is a rapidly evolving field that involves the interconnection and interaction of smart objects (objects or devices with embedded sensors, onboard data processing capability, and a means of communication) to provide automated services that would otherwise not be possible. IoT is not a single technology, but rather involves the convergence of sensor, information, communi ...

9. 07: Information Technologies (IT)

Release Date: 11-08-2015Open Date: 11-08-2015Due Date: 12-08-2015Close Date: 12-08-2015

Introduction Information technology is increasingly impacting almost every aspect of our lives, from communicating with friends and family to manufacturing of the products that we use, the efficient supply of food, the provision of healthcare services, and the performance of financial markets and our nation's economy.The past decade has seen explosive growth in the generation of data and the creat ...

10. 08: Semiconductors (S) and Photonic (PH) Devices and Materials

Release Date: 11-08-2015Open Date: 11-08-2015Due Date: 12-08-2015Close Date: 12-08-2015

Photonics (PH) The Photonics topic addresses the research and development of new materials, devices, components, and systems that have the potential for revolutionary change in the optics and photonics industries. Proposals should be motivated by market opportunity, a compelling value proposition, clearly identified end users and customers of the proposed technology, and a viable pathway to commer ...
