

Accelerating Innovation and Transition with DARPA Regional Workshops

At universities throughout the United States, leaders from DARPA's Embedded Entrepreneurship Initiative and the Small Business Programs Office will offer workshops focusing on the strategic transition and commercialization of DARPA-funded research and technology. The event schedule includes:

August 29	Colorado State University
October 3	Ohio State University
November 14	Texas A&M University
December 12	University of California, San Diego

Please join us for an engaging program featuring DARPA's Chief of Commercial Strategy and the Director of the Small Business Programs Office. They will be accompanied by accomplished innovators, creative entrepreneurs, and senior commercial advisors that have helped navigate markets and steer successful transitions of DARPA-funded technologies. Learn how you, or your organization, can become a part of the DARPA ecosystem that advances innovation and ensures U.S. national and economic security.
